

SUMMARY

Hands-on software and technical leader with 15+ years across full-stack development, systems analysis, integrations, and team leadership. Strong at working directly with business users to understand how work actually gets done, turning unclear requirements into practical software, and guiding teams from build through launch. Comfortable moving between client conversations, architecture, coding, delivery, and developer mentoring.

CORE SKILLS

- | | | | |
|--------------------------------------|--------------------------------------|--|------------------------------------|
| • Full-stack application development | • Technical discovery & requirements | • Architecture & solution design | • Backend services & integrations |
| • Developer leadership & mentoring | • Code review & sprint planning | • Workflow automation & internal tools | • Client-facing technical delivery |

PROFESSIONAL EXPERIENCE**Director, Product Operations / Technical Lead**

Nov 2021 – Jun 2025

GPARENCY · Howell, NJ

- Built and led an Agile development team, including hiring, mentoring, technical guidance, and day-to-day delivery.
- Worked across product, design, marketing, leadership, and engineering to turn evolving business needs into executable software.
- Coordinated internal and offshore developers, clarified technical work, removed blockers, and kept delivery moving across concurrent initiatives.

Technical Operations Manager

Aug 2020 – Nov 2021

Eastern Union · Howell, NJ

- Led migration from third-party platforms to internal systems tailored around operational workflows.
- Worked directly with business users and technical teams to define needs, improve systems, and support implementation.

Software Analyst

Oct 2015 – Aug 2020

CardCash · Lakewood, NJ

- Built automated workflows and internal software that reduced manual processing and operational friction.
- Collaborated across departments on system changes, testing, analytics, troubleshooting, and data integrity.

Web Developer

Feb 2013 – Oct 2015

Central Analysis Bureau · Lakewood, NJ

- Built internal tools and web applications supporting staff workflows and business operations.

Web Developer

Jul 2012 – Feb 2013

New York Guest Services · New York, NY

- Developed website features and maintained internal systems across the application lifecycle.

RECENT CLIENT & CONTRACT WORK

MedFlo AI (2025) — Short-term technical work supporting an AI healthcare startup's website and web application.

Zen Health (2025) — Collaborated on a tailored public website and customized user experience.

Matzah.store (2025) — Collaborated on a customized e-commerce storefront and supporting integrations.
